

VOCCA

Voice Activated Light Bulb Adapter

Having a hard time moving around the room?

No Problem!

VOCCA allows you to simply screw any bulb into the VOCCA adapter, connect the adapter into any light socket and say the magic words "Go Vocca Light" to switch your lights on or off!

VOCCA is so simple,
yet, so powerful.
Give it a try, you
won't regret it.

It requires
No Setup | No Wi-Fi | No Installation

ActiVo)cal A little assist goes a long way!

VOCCA's Main Features:

You can turn the lights on or off without moving a finger....

- ★ Bulb still acts regularly when using the wall light switch
- ★ VOCCA can handle bulbs which do not consume more than 30W of power. This covers most LED or CFL bulbs in the market today
- ★ Has a default voice trigger. Works out-of-the-box
- ★ No need for a professional installer – easy as changing a light bulb
- ★ State of the art, Speaker Independent, continuously listening voice trigger
- ★ Works with any mains voltage (110/220V – 50/60Hz)
- ★ Standard Edison screw (E27)

A little assist goes a long way!
